

## Product Data Sheet

### EZ Cap™ Firefly Luciferase mRNA (5-moUTP)

<b>Modification:</b>	EZ cap, 5-moUTP, poly A
<b>Concentration</b>	1 mg/ml
<b>Buffer:</b>	1 mM Sodium Citrate, pH 6.4
<b>Storage:</b>	-40°C or below
<b>Expiration Date:</b>	6 months

#### Description

EZ Cap™ Firefly Luciferase mRNA will express luciferase protein once entering cells, which is initially extracted from firefly *Photinus pyralis*. This enzyme catalyzes ATP-dependent D-luciferin oxidation and lead to yield chemiluminescence at about 560 nm wavelength. Firefly Luciferase is a frequently used bioluminescent reporter for gene regulation and function study. It is applicable in assays for mRNA delivery, translation efficiency, cell viability and in vivo imaging etc.

EZ Cap™ Firefly Luciferase mRNA is provided at a concentration of 1mg/ml. It is co-transcriptional capped by EZ Cap™ Reagent AG (Catalog No.B8176) which generates a cap 1 structure with high efficiency. Cap 1 structure is more ideal for mammalian systems and possesses higher transcription efficiency than Cap 0 structure (ARCA and mCap). The addition of poly (A) tail increases the stability and lifetime of the mRNA in vitro and in vivo. Poly (A) tail also plays an important role in enhancing the efficiency of translation initiation.

#### Caution

**FOR RESEARCH PURPOSES ONLY.**

**NOT FOR HUMAN, VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.**

*Specific storage and handling information for each product is indicated on the product datasheet. Most APEX BIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.*
